DOCK LEVELLERS

Assist loading and unloading with a Dock Leveller System.

Manufactured to full European safety standards and specifications.

Safety is assured by a pressure lock valve within the single ram, which prevents the platform descending under load if the vehicle inadvertently pulls away or in the event of a hose failure.

The leveller is available with a hinged swing or telescopic extending lip and can be manufactured to suit new or existing pits.

KEY FEATURES.

Heavy duty chequer plate platform and lip.

Reinforced sub frame with integral toe guards.

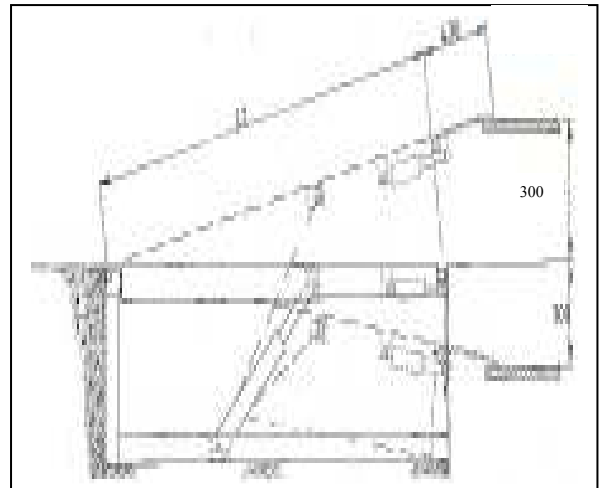

Large diameter main cylinder.

Automatic lip operation.

Hydraulic function controlled by fluid logic block providing optimal safety and durability.

Standard capacity 6.5 tonnes.

Anti corrosive finish

Our policy is one of continuous product development and we therefore reserve the right to vary the product specification in this sales brochure
